Gold Plumbing in Gold Coast

At Gold Plumbing we specialise in the testing and commissioning of backflow devices across the Gold Coast. Our services include:

Backflow Device Testing and Commissioning ? we confirm the device is working as it should be and identify any issues as well as providing solutions if needed.

Backflow Device Certification ? we provide compliance certificates to the property owner and local government authority (Gold Coast City Council). And can set-up an automatic reminder to test and commission the device yearly.

Backflow Device Installations ? we can install and certify new backflow devices as part of new builds or renovation requirements.

What is a Backflow Prevention Device?

It's a device that prevents a contaminated source entering your potable (drinking) water supply. How does this happen?

Backflow occurs when water pressures change from you house to the water main resulting in drawing in of non-potable sources which might be harmful.
