

99 Glenwood Drive, Thornton NSW 2322

Secure Compound

Located at the start of Thornton's industrial area, the 700m2 building would suit a variety of business from light fabrication to storage and distribution. With its close proximity to the New England Highway and the Pacific Motorway (M1) it's an ideal position for transporting goods.

The colour bond construction makes for a user friendly building as well as creating a secure property, with ample concrete hardstand.
