The secret to its success is the business's exemplary customer service, and it thrives with a very hands-on approach, operating 10 am-4 pm 7 days a week. New ownership would be seeking a friendly family business and would be competent in customer service and admin skills ? the systems in place make it possible for one happy motivated individual to manage daily operations. You will also have the option of hiring qualified staff on a regular or part-time basis. Transferring to new owners would be a smooth process, with everything already set up and training
